

# **Federally Obligated Projects Federal Fiscal Year 2018**

**(October 1, 2017 – September 30, 2018)**

## **Regional Planning Commission**

**Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. John, St. Tammany and Tangipahoa Parishes**

## FISCAL YEAR 2018 FEDERALLY OBLIGATED PROJECTS

### *PURPOSE*

In carrying out its transportation planning responsibilities under The FAST Act (23 CFR part 450 AND CFR part 613), the Regional Planning Commission (RPC) prepares an Annual Listing of federally funded projects that were obligated in the preceding year. An obligation refers to the funding commitment made by the federal grantor agency (FHWA or FTA) to pay the federal share of a project's capital or operating cost.

The RPC works cooperatively with Louisiana Department of Transportation and Development (LADOTD) and the region's transit properties in preparing the Annual Listing for federal fiscal year 2018 for the New Orleans Metropolitan Planning Area (MPA). The MPA consists of Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles and St. John the Baptist parishes. The RPC also lists projects in St. Tammany and Tangipahoa parishes, which have urbanized areas.

The Annual Listing of obligated projects is for the period October 1, 2017 through September 30, 2018. The next listing will be published in last quarter of 2018, or about 90 days following the close out of the federal fiscal year. The projects are organized by parish and state project number. A brief description is provided as to the nature of the project (i.e., pedestrian path, bike path, overlay, reconstruction, etc.), federal and state funding source, bid letting date, and construction cost.

For Interstate highways, U.S. highways, and state routes, the LADOTD is the project sponsor. For arterial streets within the MPA, the parish or local municipality is normally the project sponsor and provides the local share match requirement on federal-aid urban projects.

Projects contained in the Annual Listing can be cross-referenced with the region's Transportation Improvement Program (TIP). Both documents are accessible through RPC's website at [www.norpc.org](http://www.norpc.org). RPC routinely maps both the TIP and all projects let to construction within the MPA. Copies of the Annual Listing as well as TIP maps may be viewed at RPC offices during normal working hours. RPC continuously updates its website and posts these maps for on-line viewing or download.

## **BACKGROUND**

The RPC is statutorily mandated to assess the transportation and economic development needs and deficiencies of the region with direction from public officials, citizens, modal representatives, local planning departments, and the LADOTD. The formal Commission membership consists of a combination of public officials and citizen members of the six participating parishes (Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. John, St. Tammany and Tangipahoa Parishes), and the Secretary of DOTD.

The Commission also hosts a policy group called the Transportation Policy Committee (TPC) that wields final decision-making authority concerning federal transportation programs. The RPC broadened the TPC in 1991, adding significant modal representatives to provide for a broader constituency on regional transportation issues.

RPC is the Metropolitan Planning Organization (MPO) for the New Orleans urbanized area and the Mandeville/Covington and Slidell urbanized areas in St. Tammany Parish and for the Hammond/Ponchatoula urbanized area in South Tangipahoa Parish. The nation's transportation bill (FAST Act) requires as a pre-condition for accessing federal-aid highway or mass transit funds the designation of an MPO for each urbanized area. The RPC, acting in its capacity as the MPO, has responsibility for planning, programming, and coordinating federal-aid transportation investments within the above urbanized areas.

The RPC is assisted in its planning and programming efforts by a Technical Advisory Committee (TAC) that is comprised of public works directors, planning directors, and transit operators. The TAC meets on a quarterly basis to review proposed amendments to the TIP and hear recommendations from each of the TAC's subcommittees. Subcommittees include: the Transit Advisory Council; the Complete Streets Advisory Council; and, the Freight Advisory Council. Other advisory committees meet on an ad hoc basis as policy advisement and projects arise. These councils work collaboratively with RPC's TAC. At its quarterly meetings, the full TAC is advised of work taking place at the council level, and also is able to learn of proposed amendments to the Metropolitan Transportation Plan or TIP and provide counsel to the RPC policy-board when needed.

## ***METROPOLITAN TRANSPORTATION PLAN***

There are two complementary planning documents to meet the MPO responsibility to prioritize projects in the urbanized area. The first, required pursuant to 23 CFR 450.322, is the Metropolitan Transportation Plan (MTP). It is the chief legal document reflecting the resources, the fundamental planning process, and the selection of projects for the region. The MTP describes the long-term transportation needs and goals over a minimum 20-year regional planning horizon. The second, the Transportation Improvement Program (TIP), details funding and programming for the first four to five years of the plan. Pursuant to changes in the Air Quality status of the region, and in accordance with federal regulations, the RPC reviews the MTP at least every five years and the TIP is updated (revised) biennially.

The Metropolitan Transportation Plan is a 30-year forecast of transportation improvements and projected funding in the Metropolitan Planning Organization urbanized area. It incorporates policy considerations and related long term impacts. Discussions with parish officials and planning departments encompass land use changes, population growth and density patterns, and commercial and residential zoning questions. Any effects, achieved or desired, resulting from improved Transportation System Management, are also carefully included when writing the Metropolitan Transportation Plan (MTP). Being fiscally constrained, the MTP must be revised every five years so those incoming or newly identified projects can rotate on to the list if they are deemed a high priority. All regionally significant projects are identified in the plan regardless of their funding source; and, in many cases, projects are funded with combinations of state, federal, and local funds.

## ***TRANSPORTATION IMPROVEMENT PROGRAM***

The Transportation Improvement Program for the New Orleans urbanized area is a biennial update of the first five years of the MTP. This provides an immediate map for upcoming projects and follow-up phasing. It is a baseline, specifically for the first two years, while years three and four give an outline of projects in the pipeline. It is the opinion of the Commission that the inclusion of these future projects is warranted to best inform all stakeholders well in advance of potential start dates. No project will be accepted into the Transportation Improvement Program unless it is in accordance with the policies, goals, objectives, strategies or projects in the MTP.

The TIP is the region's adopted list of projects (public transit, roadway, bicycle and pedestrian, safety, air quality) that collectively contribute to the preservation of the existing transportation system, enhance the nation's global competitiveness, and foster livability and environmental sustainability within the region. The TIP implements the fiscally-constrained MTP and includes state funded projects. Most of the projects in this obligation report are from the most recently updated TIP. The TIP documents may be accessed through RPC's website at [www.norpc.org](http://www.norpc.org).

## ***PUBLIC INVOLVEMENT***

The Regional Planning Commission is committed to providing the public with meaningful opportunities to influence the transportation decision-making process. In order to provide these opportunities, RPC works to educate the public about our processes, involve them early and throughout the development of plans, and provide complete, accessible, and timely information. RPC complies with federal regulation and guidance pertaining to public involvement, and constantly strives to employ effective strategies tailored to engaging the public within our region.

## ***OBLIGATION REPORT***

In FY-18, a total of 128 million was obligated for 76 transportation and 40 million was obligated for 33 transit projects. Highlights on the expenditures of funds include the following:

- 19 Preservation of Roads and Bridges projects totaling \$68 million (53%)
- No New Roadway Capacity projects were funded
- 7 Enhancements Projects totaling \$4.8 million (4%)
- 18 Operational Efficiency and Safety Projects totaling \$33.5 million (26%)
- The largest road project obligation totaled \$28 million for US 11: Lake Pontchartrain Bridge Rehab Phase 2 (Hbi) in Orleans Parish. Other significant investments included \$14 million for I-10: Med Protect, Oak Harbor Light / Ramp in St. Tammany Parish, \$6 million for I-12: Livingston P/L - US 51 Bus overpass in Tangipahoa Parish,
- The largest Transit project completed was Bus Preventative Maintenance for the Regional Transit Authority (RTA) in Orleans Parish at \$12 million. In St. Tammany Parish \$4 million went to the St. Tammany Area Transportation (STAR) Transit for operational assistance and \$3 million was spent in Jefferson Parish to aid Jefferson Transit (JET) with Operational Assistance.
- 9 of the transportation improvements were under \$3 million accounting for 37% of all funds.
- 10 of the transportation projects had net obligations greater than \$3 million. These projects accounted for 63% funds

The Annual Listing of Obligated Projects is organized by Parish and State Project Number. The sponsor is typically the LADOTD or the local parish or municipal government. Each project is described by a specific street or state route and the type of improvement (i.e., rehabilitation, reconstruction, patch and overlay, etc.) is noted. The funding source is identical to that shown in the TIP and is consistent with basic categories of federal-aid funding.

The total project cost is the net obligation amount authorized by the federal grantor agency. Each project has been identified with all of its funding sources; the funding amount has been listed under the project's primary funding source which is listed first in the column. The project's bid letting date is shown to provide state, local officials, and the public with information on when the project was started and a better sense of the continuity of the entire program. While federal funding is the focus of this obligation report, state funded projects were also reported to provide the public with more

complete information on the scope, size, and magnitude of the region's transportation program as well as regionally significant projects which are being funded with state funds.

In FY-18, federal and state obligations were distributed through the following TIP categories:

- **Demo or High Priority Funds** are earmarks identified by members of Congress for specific projects.
- **Bridge On-System** (FBRON) and Bridge Off-System (FBR-OFF) are federal funds used for the replacement, rehabilitation or widening of any public bridge structure.
- **Congestion Mitigation/Air Quality** (CMAQ) funds are used to reduce transportation-related emissions in non-attainment and maintenance areas for ozone, carbon monoxide, and small particulate matter.
- **FHWA Emergency Relief** (ER) funds have been used to restore federal-aid routes that were severely damaged by Hurricanes Katrina and Rita. The ER funds are 100% federal and have been used for basic street restoration work (patch, mill and overlay) as well as bridge replacement.
- **Highway Safety Improvement Program** (HSIP) funds are used for (1) any highway safety improvement project on any public road or publicly owned bicycle or pedestrian pathway or trail; (2) as provided in subsection 23 U.S.C. 148(g); or (3) any project to maintain minimum levels of retro-reflectivity with respect to a public road without regard to whether the project is included in an applicable State strategic highway safety plan.
- **National Highway Performance Program** (NHPP) funds are used (1) to provide support for the condition and performance of the National Highway System (NHS); (2) to provide support for the construction of new facilities on the NHS; and (3) to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.
- **Recreational Trails Program** (RTP) provides funds to the States to develop and maintain recreational trails and trail-related facilities for both non-motorized and motorized recreational trail use.
- **Surface Transportation Program** (STP >200k) is used within the NO planning area to fund roadway reconstruction, rehabilitation, traffic operational improvements, bicycle and pedestrian facilities, and studies.
- **Surface Transportation Program** (STP <200k) is used within the ST and MC/SL planning areas to fund roadway reconstruction, rehabilitation, traffic operational improvements, bicycle and pedestrian facilities, and studies.
- **Surface Transportation Program** (STP Flex) is a flexible funding category that is typically used by DOTD to fund roadway reconstruction, Intelligent Transportation System (ITS) projects, bridge or interchange work.

- **Surface Transportation Program (STP HAZ)** funding is used to correct or eliminate hazardous conditions, improve traffic safety, and replace and upgrade traffic signal equipment.
- **Surface Transportation Program (STP ENH)** enhancement funds are typically used to fund bicycle and pedestrian projects, transportation-related historic preservation projects, environmental mitigation projects, conversion of rails-to-trails projects, and landscaping and beautification projects.
- **FTA Section 5307** funds are used for capital, operating assistance, preventive maintenance and planning purposes for mass transportation improvements in urbanized areas.
- **FTA Section 5316** funds are used to address the unique transportation challenges faced by welfare recipients and low-income persons seeking to obtain and maintain employment.
- **FTA Section 5317** funds are used to provide additional tools to overcome existing barriers facing Americans with disabilities seeking integration into the work force and full participation in society.
- **FTA Section 5337** State of Good Repair grants fund the maintenance, rehabilitation, and replacement of fixed guideway transit systems, including rail (streetcars) and High Occupancy Vehicle motorbus routes. These funds can be used for capital expenses related to rolling stock, tracks, passenger stations, powering, and other rail transit and high intensity bus facilities and equipment.
- **FTA Section 5339** Bus and Bus Facilities grants fund capital projects that replace, rehabilitate, and purchase buses, vans, and related equipment. They can also be used to construct bus related facilities.

The Annual Listing identifies several stand-alone bicycle and pedestrian improvement projects. In other instances, the bicycle and pedestrian components were part of a larger street rehabilitation project. Bicycle, pedestrian, and American Disability Act improvements are noted in the report column under Improvement Type. The projects contained in the Annual Listing, and maps depicting their locations, can be found with the TIP documents which can be accessed through RPC's website [www.norpc.org](http://www.norpc.org).
