

S2: BACKGROUND

Project Funding, Timeline, & Outcomes

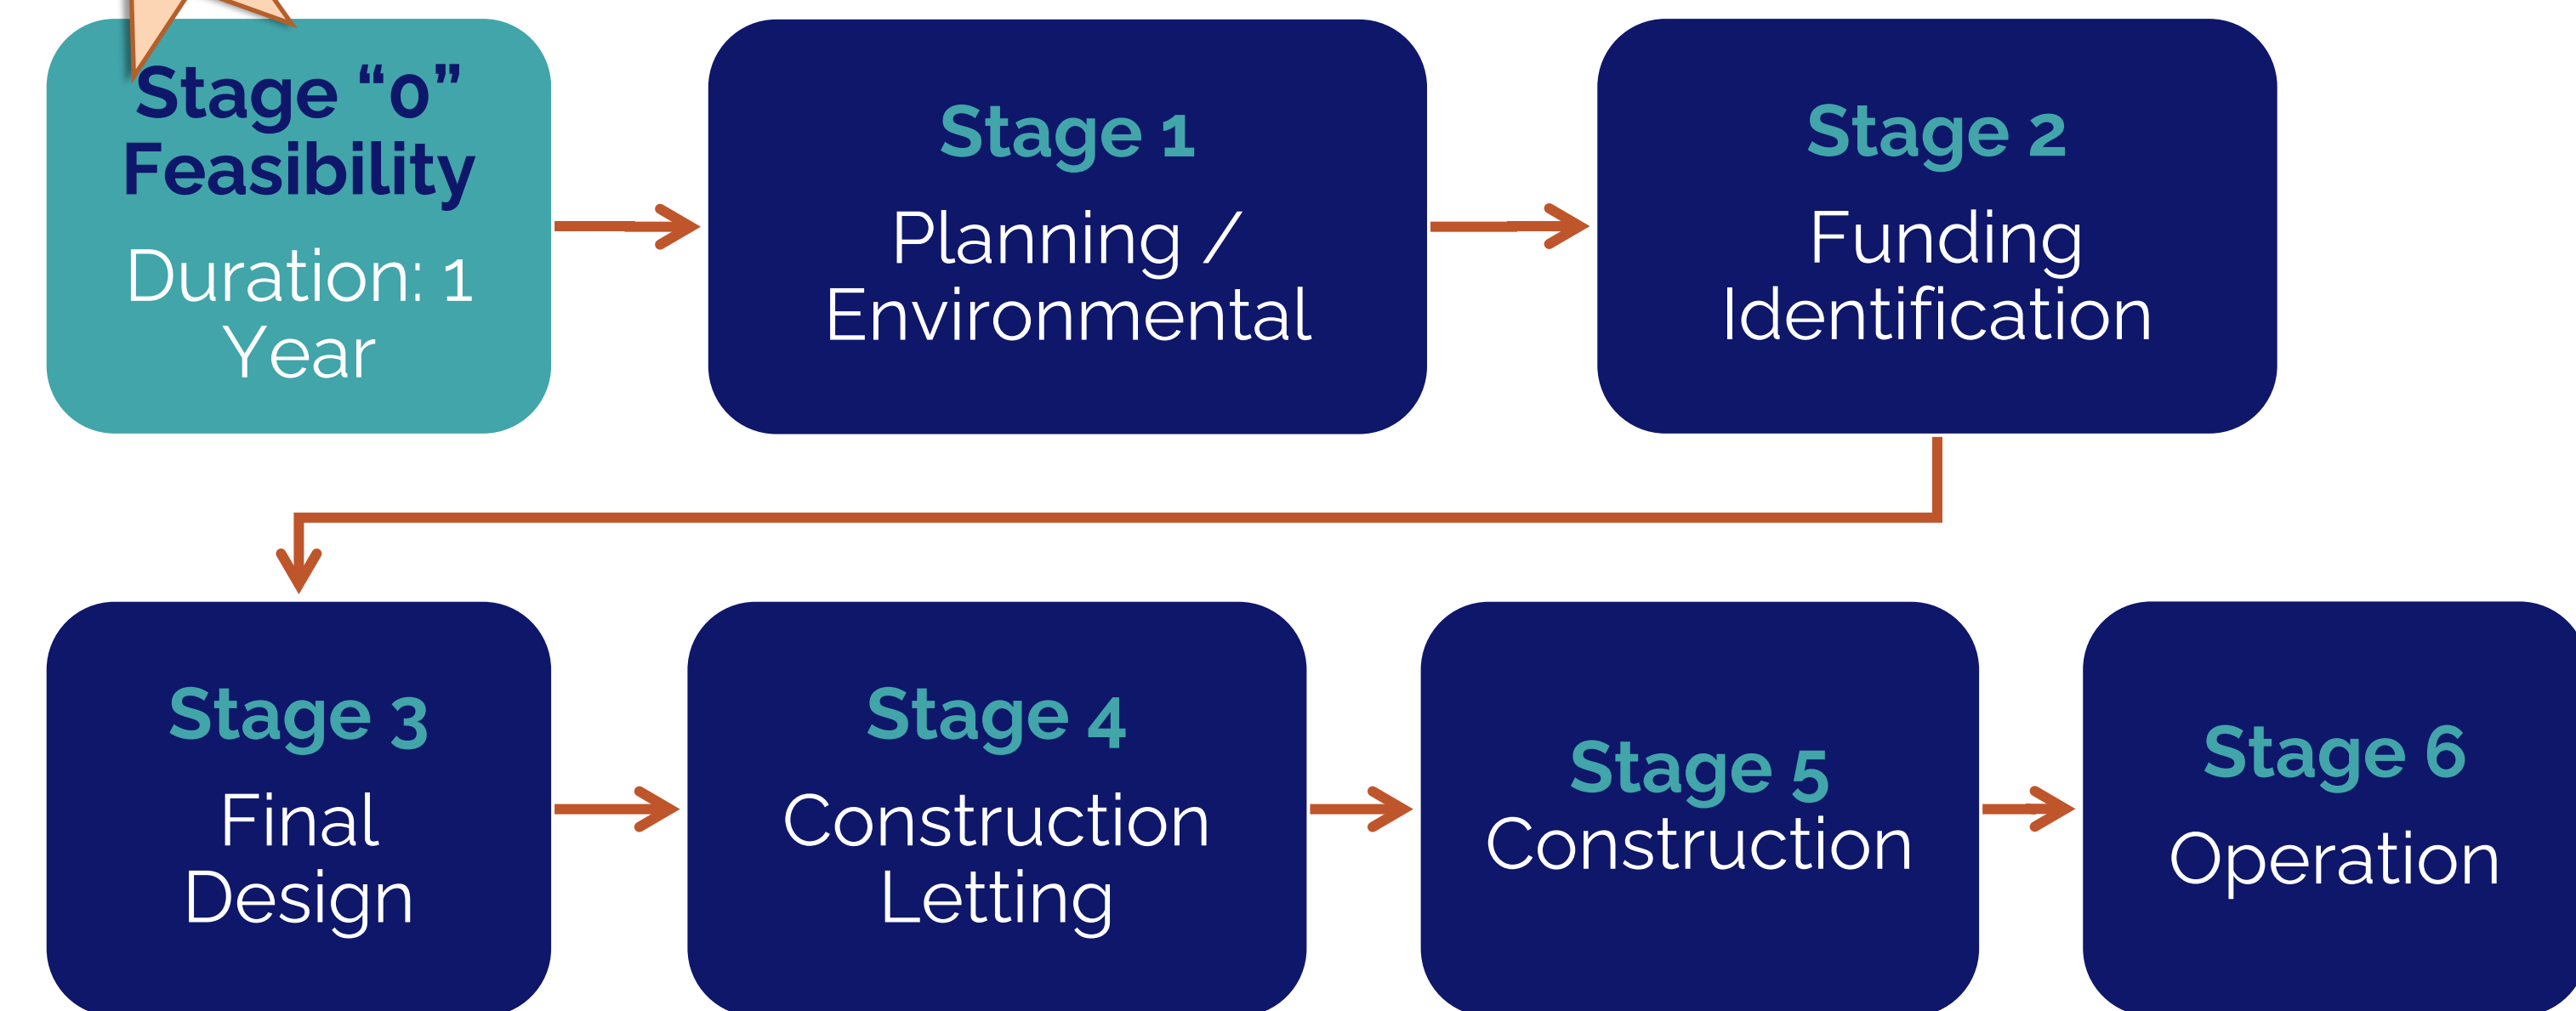

There are more steps required beyond this Study, by others, that will further inform any future roadway network investment and related maintenance support.

80% of Study is paid for with federal dollars allocated to the Regional Planning Commission for transportation planning purposes and 20% is from funding allocated to the Port of New Orleans by the State legislature.

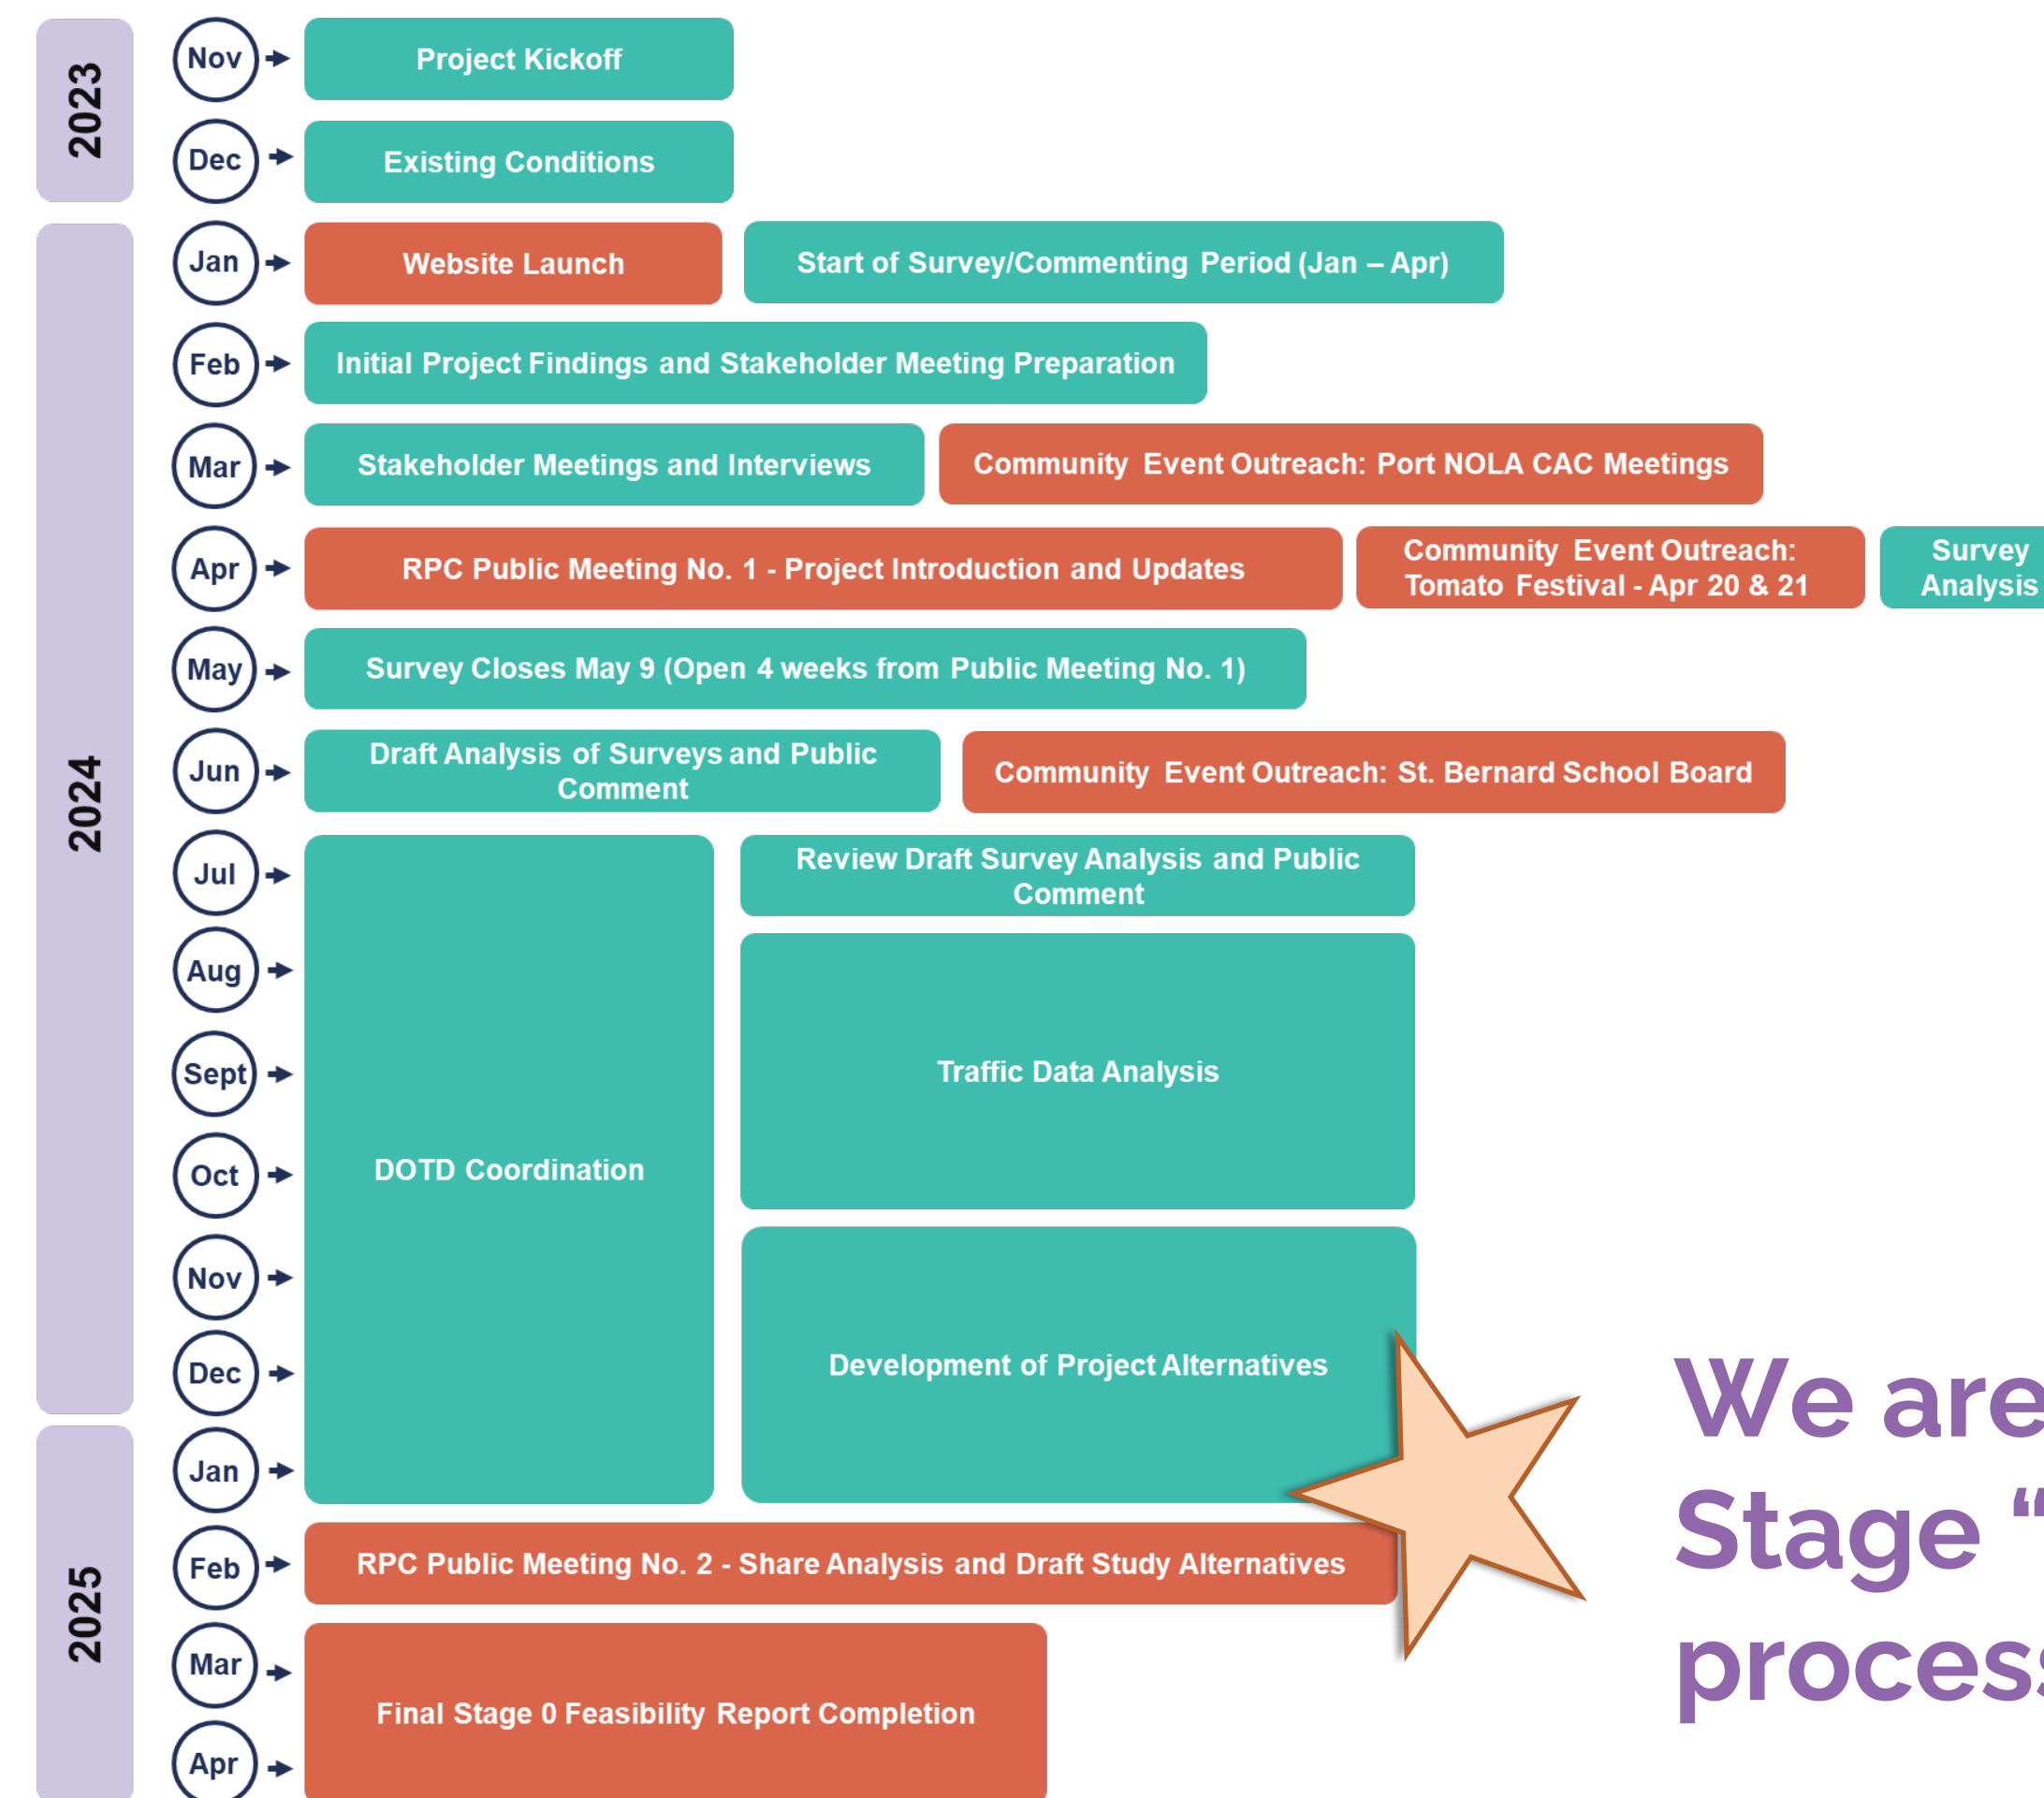

LA DOTD PROJECT DELIVERY PROCESS

Each LA DOTD Transportation project goes through distinct phases during its life-cycle, from feasibility analysis (where we are now) to operation.

We are here in the DOTD process!

STAGE "0" STUDY TIMELINE

MILESTONES

Internal: █
External: █

We are here in the Stage "0" Study process!

OUTCOMES & NEXT STEPS

1. This STAGE "0" Study results in development of up to three (3) project alternatives and identification of improvements to exiting roadways.
2. The STUDY FINAL REPORT is forwarded to the Louisiana Department of Transportation and Development (LA DOTD) to conduct a Stage 1 environmental review process and identify funding sources which may include a public-private partnership.
3. LA DOTD refines design, engineering and cost estimates.
4. LA DOTD advertises and contracts for project construction.
5. Construction for the selected project alternative(s) may begin.
